

*Cereals 2011 will see FarmGEM introduce a vertical folding boom to their range, and it will be fitted to the FSV mounted with "Slimline" 1200 or 1500 litre tank capacities . The new 9 section 24m boom can hydraulically fold to 12, 18 and 24m. It also has full electro hydraulic control of variable geometry and independent folding. It is will also be available in a 7 section version for 18, 20 and 21 metre widths.*

*The boom is constructed using high tensile steel with all hinges re-enforced and with FarmGEM proven system of bearings and bushes, benefiting enhanced boom durability and easy maintenance of wear points. The pressed steel lattice construction reduces weight but enhances strength with all nozzles carried on high capacity stainless steel spraylines and concealed within boom structure for protection.*

*Strong, lightweight and durable, these are just some of the features of this new boom, designed to meet the demanding conditions the UK Farmer faces.*

*The in-cab control box manages all of the boom electro hydraulic functions and the "844E" automatic application rate controller incorporates boom section shut off and controls the sprayline priming and purging system which is fitted as standard.*

*As with all FarmGEM machines the FSV has a simple control layout, along with excellent operator access. The clever plumbing system ensures that residues of less than 3 litres remain after complete emptying of the spray tank, keeping disposal problems to an absolute minimum. The 120 litre clean water system allows quick and easy rinsing in the field.*

*The machine is supplied complete with a 260 litre/min diaphragm pump, an induction hopper that is extremely effective at incorporating powders and granules, and is fitted with an integral wash down system and powerful container rinsing nozzle. Suction filling is also a standard feature.*

*All FarmGEM Classic and Millennium machines are tested to the UK NSTS standard and have an impressive 3 year warranty.*

The FarmGEM Cereals stand is B208. Give me a call if you need anything more.
