## **KIRKBY TYRES Wholesaler and Distributor extraordinary – Stand No E636 at Cereals 2011**

Kirkby Tyres have been at the forefront of tyre and wheel wholesaling and distribution for over 60 years. During that time they have established themselves as one of the largest tyre and wheel 'full line wholesalers and distributors' in Europe with a head office and warehouse on a six acre site next to John Lennon airport in Liverpool and offices in Scotland, Ireland and China.

Kirkby Tyres have built an enviable reputation for the wide range of stock held, the quality and performance of the products supplied, a dependable delivery service from a centralised distribution point and their economic and competitive pricing policy - a proven record of quality and performance.

Holding one of the largest and most comprehensive ranges Kirkby Tyres supplies tyres, tubes and wheels to the Agricultural, Plant, Earthmover, Truck, Industrial, ATV, Turf, Car, Van, 4 x 4 and OE markets. A representative sample of their wide range of tyres can be seen at Cereals 2011 on Stand No. E636.

Kirkby Tyres have long established links with the international tyre and wheel market which means that they are able to source and sell a vast range of products worldwide, with the result that they are now a major exporter of tyres and wheels to most areas of the world.

Kirkby Tyres are the sole UK and Ireland agents for the extensive **Alliance** range of agricultural and earthmover tyres and the **Double Coin** premium

range of all steel radial high performance truck tyres. A large stock of **BKT** agricultural and off road tyres are also available which includes the latest Agrimax Teris 1050/50 R32 for combine harvesters where reduced soil compaction and heavy load carrying capacity at low pressure is important.

**Alliance** introduces the Farm PRO series – initially eight new radial tyres with new modern patterns alongside the existing 356 range. The Farm PRO traction tyre has a multi-angle lug with a steep central angle for a smooth ride, long wear and mud clearing properties and a shallow angle at the shoulder for exceptional traction and hillside stability. The Farm PRO Imp high flotation tyre has a strong Bias ply with a new pattern, central rib and shoulder lug design. It has excellent self cleaning properties, good sideways stability and offers a comfortable ride. Because of its low soil compaction characteristics and low rolling resistance it can also be used safely on tender grassland.

**Galaxy** tyres have been part of the Alliance Tyre Group since December 2009 and include the popular and market leading turf and specialist tyre ranges 'Mighty Mow' and 'Turf Special' which have become the most used and sought after golf/turf tyres in the industry.

With 93 different patterns and 428 sizes Galaxy tyres are available for Skid steer, Golf & Turf, Forestry, Flotation, Agricultural and Implement, Off The Road and Industrial applications.

Kirkby Tyres have recently installed a new 'Midas' on-line ordering system - a virtual warehouse - giving customers the ability to view stock, price and availability 24 hours a day 7 days a week. A next day delivery service is available to anywhere in mainland UK.

Kirkby Tyres also offer a full range of wheels and wheel assemblies for any fitment in the truck, rowcrop, trailer, wide-flotation, hi-speed/low compaction, earthmover and industrial markets. All wheels are made to OE specification, supplied in the colour of your choice and can be manufactured in small batch runs or in high volumes to suit your requirements.

For more information or any general sales enquiries please contact the Sales Team on: 0870 242 8800 [www.kirkbytyres.co.uk](http://www.kirkbytyres.co.uk)
